BARĀWA: Landscape of a better tomorrow

The Barāwa Biodiversity Park is to be located within the areas coming under the Divisional Secretariats of Homagama, Seethawaka (Hanwella) and Padukka in the Colombo District. The area is easily accessed from the Colombo-Ratnapura Road (A4 High Level Road) between the 31st and 32nd km posts or from the Colombo-Ratnapura (AB 10 Low Level Road) between the 27th and 28th km posts.

The total project area of 180 ha (444ac) is a typical rural setting but surrounded by major urban centers such as Homagama and not too far from Colombo. It is made of two blocks, connected by the Pusweli Oya, a perennial water source and a major tributary of the Kelani Ganga.
